SECTION 3 - SERVICE OFFERINGS**3.1 General**

The regulations set forth in this section govern the application of rates for Services contained in other sections of this Tariff.

3.1.1 Application of Business and Residential Rates

- A. The determination as to whether Service should be classified as Business or Residential is based on the character of the use to be made of the service. Service is classified as Business Service where the use is primarily or substantially of a business, professional, institutional, or otherwise occupational nature. Where the business use, if any, is incidental and where the major use is of a personal or domestic nature at the person's dwelling, Service is classified as Residential.
- B. Business rates apply at the following locations, among others:
1. In offices, stores and factories, and in quarters occupied by clubs, lodges, fraternal societies, schools, colleges, libraries, hospitals, and other business establishments.
 2. In residence locations where the place of residence is in the immediate proximity to a place of business and it is evident that the telephone in the residence is or will be used for business purposes, and in residence locations where an extension is located at a place where business rates would apply.
 3. In the residence of a practicing physician, dentist, veterinary, surgeon, or other medical practitioner who has no Service at business rates at another location.
 4. In any residence location where there is substantial business use of the Service and the Customer has no Service at business rates.

3.2 Charges Based on Duration of Use

Where charges for a Service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- (A) Calls are measured in durational increments identified for each Service. All calls that are fractions of a measurement increment are rounded-up to the next whole unit.
- (B) Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s). Timing for operator service person-to-person calls start with completion of the connection to the person called or an acceptable substitute, or to the PBX station called.
- (C) Timing terminates on all calls the earlier of when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.

3.6 IntraLATA and InterLATA Presubscription

1. General

IntraLATA and InterLATA presubscription is a procedure whereby a subscriber designates to the Company the carrier which the subscriber wishes to be the carrier of choice for intraLATA and InterLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. IntraLATA and InterLATA presubscription does not prevent a subscriber who has presubscribed to an intraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative intraLATA or InterLATA toll carrier on a per-call basis.

2. The Company will provide IntraLATA and InterLATA presubscription in compliance with applicable law.
